All above items are supplied self-adhesive as standard. Drilled and countersunk with matching screws available on request.

When ordering, please quote product code and fixing

Product and specification details are correct at time of going to press but are subject to change without prior notification

COLOUR COATING

All items of door furniture can be colour coated. We offer two processes: stove enamelled and air-dried. Of the two, stove enamelled is the preferred process due to its durability, especially where items are constantly handled, such as door handles and fingerplates. Door closers cannot be stove enamelled because the interior seals are unable to withstand the high temperatures required for stoving, therefore, door closers are air-dried only. Large quantities or items not shown below, are priced to special quotation.

CC101 Single Panic Bolt

CC102 Double Panic Bolt

CC103 Panic Push Pad

CC104 Locking Attachment

CC105 Door Selector

CC106 Pair of Butt Hinges

CC107 Letter Plate
