All of our tactile and braille signs are manufactured with the guidance of the Royal National Institute for the Blind to ensure that they conform to the DDA Regulations Act 1995. We supply Grade 1 Braille for short word signs or Grade 2 Braille (which is a contracted form) for longer sentence signs. The system we use enables us to supply tactile and braille signs in any metal finish, such as aluminium, stainless steel or polished brass, as well as any colour plastic. This proves beneficial when there is a need to match existing door furniture.

All products on this page are 1.5mm thick, drilled and countersunk with fixing screws as standard Materials available: SAA: Satin Anodised Aluminium, PAA: Polished Anodised Aluminium,SSS: Satin Stainless Steel, P/C: Powder Coated PX: Perspex and PB: Polished Brass When ordering, please quote product code and material required Alternative self-adhesive back on request at no extra cost Any preferred colour, finish or design can be priced on request.
